bring benefits
like

Reduced costs

Visibility of bottlenecks
and planning issues

Improved customer
satisfaction

Increased workforce
efficiency

Smarter supply chain

Constraint based
finance planning

On time delivery

Stronger sales
commitment

Infor APS – Case Study

Background: New Holland, leading manufacturer of agriculture equipment was looking to implement Infor's advanced planner for better visibility in planning processes. New Holland was looking for reliable and expert partner to implement advanced planner of Infor.

Client Requirements

Complex mapping of ERP processes

Wanted multisite modeling under one system

Wanted better delivery commitments

Wanted to utilize machine & labor capacity optimally

ERP was not able to provide current WIP

Wrong mapping of processes, no real time information, delayed decisions, delayed overall order to cash cycle

How nB Helped..

Reviewed existing processes, suggested work arounds and process changes

APS helped in achieving multisite modeling

Advanced planner helped in gaining visibility of real time data resulting in sales commitments

Increased utilization of machine and labor

Achieved WIP Tracking

Optimized Overall Order to Cash Cycle
