Our Project Methodology

Onsite/offsite model

- Onsite Consulting, Offsite Support
- Video Conferencing – Weekly Meetings
- Effective tracking & monitoring of resolving issues using defect tracking system
- Consultants can travel on-demand
- Consultants will work in your time zone (if required)
- Already successfully executed model
- nB is accountable for success of the model

Our Value Proposition

Our Capabilities On Infor ERPLN

ERPLN Case Study

Background: Sivantos (formerly Siemens Audiology), global leader in hearing instruments manufacturing, is implementing ERPLN (FP10) across locations in world. Rollout started in last year. Expected to finish global rollout project by 2018-19

Client Requirements

Wanted experienced ERPLN consultants to join project team

Multi Geographic locations to implement ERP

Evaluating Infor Solutions, realistic estimations

Global template for implementation

Combination of different team members

Quick implementation, lesser risk, localization

How nB Helped..

Joined as Extended arm of rollouts team

Rollouts across ASEAN, Europe and US

Acted as Liason between Infor and Siemens team

Helped in designing as is and to be processes

Team of Solution Architects, Business Analysts and Product Consultants

Helped in improving existing template for better results
